THE OPPORTUNITY

The Fund, via diversified exposure to privately negotiated and collateral-backed loans, has provided historically and aims to continue to achieve consistent, attractive returns with a capital preservation focus while providing low volatility and low levels of correlation to most traditional asset classes. We believe the private lending market is very fragmented and offers a significant opportunity in the sub \$30MM loan size bracket, an area that tends to be under-served, regional in nature, and competitors that offer fewer financing solutions than we can provide. As such, we continue to believe this is one of the best areas to invest in for superior risk-adjusted returns, when managed properly.

With the Bank of Canada recently cutting its interest rate, Canadian monetary policy has reached a turning point. This has created a favorable environment for fixed-income investments and presented investors with a unique opportunity to lock in attractive yields for longer.
